

Case Study

GRANITE CONSTRUCTION

Based on the scalability of the enviroLIS platform, ENKON was selected by Granite Construction to customize and deploy a feature-rich Land Information System (LIS) that would best serve their current and future land and environmental management requirements.

About Granite Construction

Granite Construction Company is a full-service general contractor, construction management firm and construction materials producer. Recognized as one of the top 25 largest construction companies in the U.S., Granite specializes in complex infrastructure projects, including transportation, industrial, and federal contracting.

The Objectives

- Digitize and Consolidate Data
- Provide Customized Programming
- Apply Specific Permissions for Data Retrieval
- View and Access Data via Mapping Interface
- Help Desk and Training Support

Decrease Service Delivery Time

Integral improves efficiency by dramatically reducing processing time.

Powerful Reporting

Accurate metrics allow your organization to measure departmental efficiencies and improve service delivery.

Superior Data Integrity

Reduction of data redundancy, increased accuracy and prevention of data loss.

The Work

ENKON deployed and hosted an enviroLIS application for Granite Construction that compiled data and provided data population services, customized programming, and help-desk and training support. The enviroLIS application was tailored by ENKON to suit Granite Construction's land and environmental management requirements, and has been enhanced by ENKON to manage a number of Granite Construction's core business processes.

The Results

Accessible via a customizable map viewer, ENKON's versatile enviroLIS application provides Granite with a feature-rich, consolidated system. The ease-of-use and familiarity of the map interface allows Granite employees to easily locate integrated information and incorporate data sets into their required workflow. The ENKON enviroLIS system employs configurable user permission settings to allow appropriate people secure access to restricted areas within in the application. The deployment of the enviroLIS Land Information System has fostered a robust relationship between ENKON and Granite Construction that is reinforced through Help Desk and training support.
